

Project Design Phase-II

Data Flow Diagram & User Stories

Date	13 February 2025
Team ID	LTVIP2026TMIDS54574
Project Name	Smart Sorting Transfer Learning for Identifying Rotten Fruits and Vegetables
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

User Stories

User Type	Functional Requirement (Epic)	User Story Number	User Story	Acceptance Criteria	Priority	Release
User (Web User)	Image Upload	USN-1	As a user, I want to upload a fruit or vegetable image to check freshness	Image uploads successfully	High	Sprint-1
User (Web User)	Prediction	USN-2	As a user, I want the system to classify the image as Fresh or Rotten	System shows correct prediction	High	Sprint-1
User (Web User)	Result Display	USN-3	As a user, I want to see prediction confidence score	Confidence percentage displayed	High	Sprint-1
User (Web User)	System Interaction	USN-4	As a user, I want a simple and easy interface	User can upload image easily	Medium	Sprint-1
Administrator	Model Management	USN-5	As an administrator, I want to integrate trained model into the system	Model loads and predicts correctly	Medium	Sprint-2
